- **MIN -30KG/ BODY**
- **@89% MOISTURE**
- **DESIGN PARAMETRE – 20 TON DRIED INJESTA @20% MOISTURE**
- **BACKGROUND:**
- **A typical slaughter house in India handles about 3500 cattle's a day and generates different forms of wastes which were simply disposed off till a couple of years back. With the rising fuel cost and stricter pollution control norms, it is becoming more and more important for slaughter houses to plan for efficient waste utilization and management systems.**
- **The indigested food that remains after the slaughtering of cattle is called "INGESTA". Typically cattle generate about 60 – 70 kg of Ingesta which is at about 85 – 90% moisture and handling 200 – 250 tons of Ingesta @ 85 – 90% moisture is one of the most challenging tasks.**
